

Case Study: A-60 Fire Rated Floor Repairs

Benefits

- Fast curing products to cause the least disruption and allow the ships normal activities to resume
- Low disruption to passengers and staff due to experienced, fully trained installers
- Products are A-60 fire rated and flexible leading to reduced risk of future cracking
- High noise reduction properties

Installation Overview

A high profile cruise ship needed flooring repairs due to its old A-60 systems starting to crack in heavy traffic areas and becoming noticeable by passengers. Due to short turnaround times a fast curing solution was required.

Solutions

- ✓ Disruption to passengers kept to a minimum
- ✓ Installation completed during a sailing using a ride on squad
- ✓ Sika fast curing products were used to meet tight timescales
