

# Case Study: Seamless Resin Flooring

## Installation Overview

A high profile Cruise Ship needed a decorative and ergonomic flooring system within its medical room; tight ship turnaround times meant quick application and cure times would be necessary. Special coving would also be required to offer the best possible cleaning and hygiene performance. The specification would also need long term flexibility and be water proof, with a seamless design continuing throughout the coved edges.

## Benefits

- Seamless Coving 100mm up walls much improved cleanliness
- Flexible and easy underfoot
- Bright and professional long term appearance
- Durable, attractive finish with numerous flake and coloured options
- Water proof system sets up long lasting solution
- Low odor, zero VOC materials make application painless for installers and crew
- Excellent chemical resistance

## Solutions

- ✓ The medical room gained a water-proof system that was easy to clean and maintain
- ✓ The IMO Flex provided a highly durable, soft under foot, seamless finish
- ✓ The final decorative appearance was welcomed by the doctors and passengers
